

METAL DAMPERS (FIRE SUPPRESSING DEVICES)

The dampers are used in firefighting to suppress mundane fires, eg fires of grass and litter.

DIMENSIONS: Length: 500 mm Width: 330 mm Weight of the damping working part: 0,9 kg

The damping working part consists of metal feathers laid in layers, permanently fixed in the holder.

We offer dampers with a wooden style with a length of 2.30 m and a diameter of 30 mm, an aluminum folding bar with a total length of 1500 mm and a diameter of 25 mm or without.

The damper aluminum rod consists of two parts:

- shorter part (50 cm)
- longer part (100 cm) fixed directly to the damping working part

Technical data of folding damper with aluminium rod

Width of the damper	330 mm
Diameter of the rod	25 mm
Length of the damping working part	500 mm
Length of the rod	1500 mm
Weight of the damping working part	0,9 kg
Weight of the rod	0,6 kg
Length of the set after folding (working part + two-piece rod)	188 cm
Set weight (working part + rod)	1,5 kg
